geniala - marking line system

The „Geniala“ marking line system was invented in the late 70s of the past century. We developed and improved the product since the first day the idea came up.

It still is produced in Germany to keep the quality standards to material and performance.

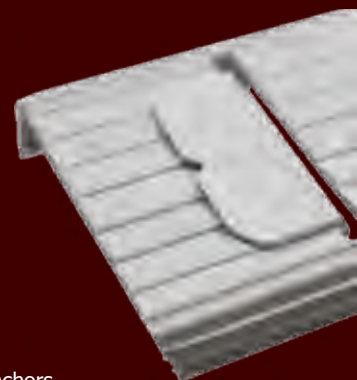

More than 50.000 courts world wide have been equipped with this outstanding product.

Not only soft courts but also new generation courts made of PU use the „Geniala“ lining system.

The system consists of pre-cut lines that have to be stretched and cut to the measurements.

The hidden anchoring elements underneath the lines in the ground keep the tension and the perfect straightness of the lines.

With our new white powdercoated slit anchors the anchoring is almost invisible.

Geniala Premium 4

4 cm / 1.6 inch.

1 OptiPlan drag net

Especially invented aluminum leveling profile with fabric netting. Small teeth at the surface of the profile and material proportioning areas are responsible for a perfect smoothing of the court surface.

Best possible weight distribution prevents a hopping of the leveling profile.

The two-piece leveling profile is re-inforced with a steel part for durable and exact straightness.

OptiPlan comes with a double layer of the heaviest fabric netting available for maximum smoothing capability.

The depth of the netting of 75 cm with a width of 200 cm guarantees easy handling, even for smaller players.

OptiPlan is also equipped with a carrying handle for easy lift up and hanging up. The nicely shaped side caps prevent the drag net from getting caught by the net or the fence during the procedure of maintaining the court.

No. 145000 piece

2 OptiPlan Z+

Alternative version equipped with a aluminum handle for optimum maneuvering.

No. 145050 piece

3 Tow rope

3,50 m including special open end fixation, suitable for all drag nets.

NO. 149602 piece

4 Wooden drag net H1-1500

Drag net with wooden leveling bar, special single layer PVC coated netting, suitable for all soft courts - 200 x 150 cm

NO. 149620 piece

As above but double layer special PVC coated fabric netting for more weight and better smoothing results - 200 x 150 cm

NO. 149630 piece

5 Special aluminum leveling bar

With steel re-inforcement, perfectly straight and sturdy, to level out material build up and low spots 200 cm, including screws and side caps.

NO. 149601 set

6 Tow handle

Aluminum, made of three pieces, fits for any drag broom or net, easy mounting.

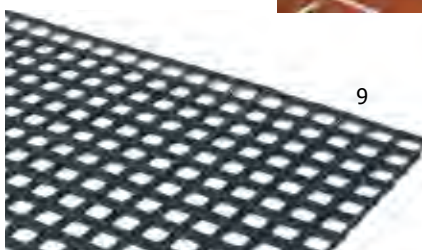

No. 140412 piece

7 Side caps

For minimizing the risk of getting caught in net or fence, made of long lasting pvc.

NO. 149601 pair

9 Replacement netting

for drag nets black, 75 x 200 cm.

NO. 149603 piece

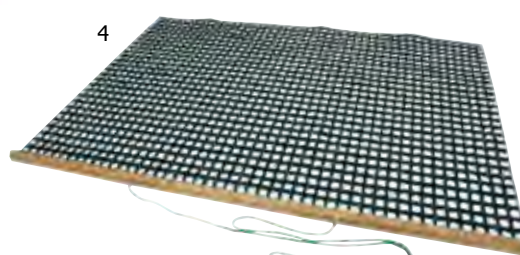

black, 150 x 200 cm.

NO. 149621 piece

8 Handle for carrying

for drag nets with wooden leveling bar, comes including necessary screws

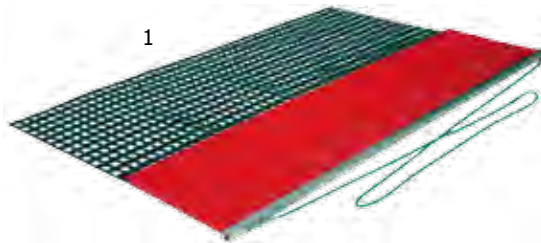

NO. 149680 piece

10 Wooden leveling bar

for leveling low spots and material build up, comes drilled and including screws, 2,00 m wide

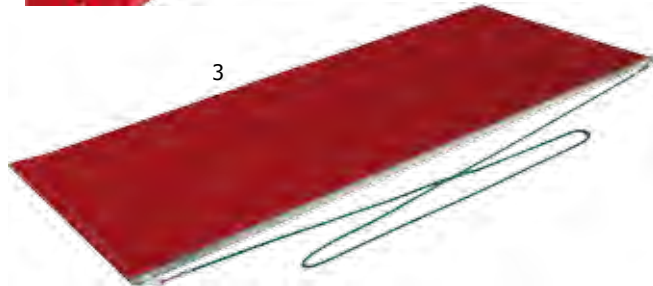

NO. 149601 pair

1 Tennis Court combination-leveler

The front PVC mat smoothes unevenness and slide taces. The back drag net smoothes the covering of the court. Working width 180 cm.

No. 139500 piece

3 Hard PVC mat

Made of individual plastic parts that are ideal for cutting of material build ups and smoothing humps or deep slide spurs. Very durable and weatherproof, also collects leafs and pine needles. Aluminum leveling bar, comes with rope. 180 cm wide.

60 cm deep

2 Drag mat „MaxiPlan“

This spezial drag net is used for adding new material into existing surface with the help of water. It comes with tow handle for best possible manoeuvring and back and forward motion that is necessary to have a connection between old and new material. Very heavy and durable pvc netting – 200 x 80 cm. Comes including aluminum leveling profile.

No. 145500 piece

5 Coconut smoothing mat

One heavy layer coconut mat with PVC edges 200 x 100 cm. Wooden leveling bar with rope.

No. 137000 piece

Replacement mat

No. 137020 piece

4 Special smoothing mat for silica sand

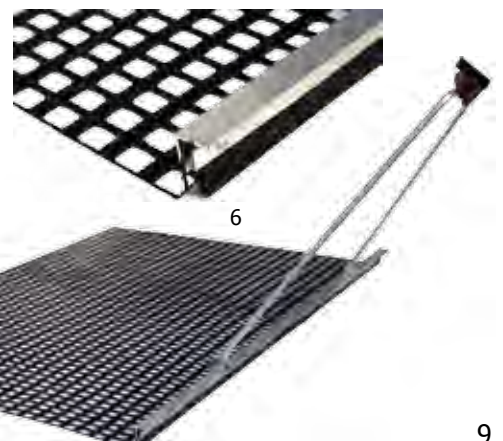

3 cm long coconut fibres, cast in PVC material. Complete with rope. Size 120 x 90 cm

No. 138000 piece

6 Combined hand leveler

Combinatin hand leveler and drag net. The ideal tool for smoothing the courts after sprinkling or rainy weather. Due to the rubber blade and the drag net two operations are done in half the time. Fill up unevenness and little holes and smoothing of the court covering. Working with width 200 cm.

No. 141050 piece

8 Mogeton

Concentrate against moss and algae. Mixture of 15 g of Mogeton with 10 l water is good for 10 sqm. One unit is good for 1.000 sqm. Box of 1.500 g.

No. 351610 box

7 Dimanin

Concentrate against moss and algae. Mixture of 50 ml with 10 l water. One unit good is for 160 sqm. 1000 ml.

1 Center Strap "Exakta"

With permanent height control.

Insport's Exakta Strap enables players to quickly adjust the correct net height. In addition, it uses two visual criteria that make permanent control of the net height possible.

The simple handling of this center strap is fascinating. After the net is secured. The strap goes through a unique strap-buckle, then the loop is attached at the center strap anchorage by means of the spring hook.

The check points for height adjustment and control are the perforation and the trip of the strap. When the perforation is on the top of the net border and the strap tip touches the court surface, the correct height of 3 ft. is set. When these points are not in place, the loop has to be expanded or shortened.

No. 152600 piece

2 Center strap plastic buckle

Made of high-strength nylon with plastic buckle.

No. 152120 piece

Center strap Velcro

with plastic snap lock, spring hook and Velcro strip for height adjustment.

No. 152100 piece

3 Center strap with adjustment loops

Made of PVC, with adjustment loops and spring hooks.

No. 152130 piece

No. 151955 piece

9 Ground anchor U-shape

Steel galvanized, to hammer in, easy to use.

No. 151980 piece

11 Tennis net weight

Made of steel pipe with suspension eye for strap.

No. 151800 piece

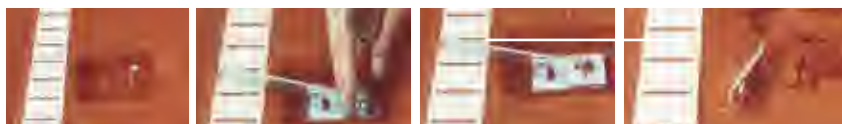

12 Center strap anchoring „PRAKTIKA“

After the lines are in place, this Center Strap Anchoring System is easily and quickly installed. The anchor is installed below the court surface and next to the center line. This eliminates the need to adjust the lines to accommodate the center strap.

Correct installation ensures that the strap is exactly on center. When the center strap is detaches, the anchoring element can be places in a position flush with the court surface. In this position it will not interfere with court maintenance.

The net strap anchoring system consists of a 20 inch long steel bar, a galvanized anchoring element and a galvanized spring clamp to fix the anchoring element to the steel bar. The "Praktika" is supplied with a galvanized installation tube and mounting instructions.

No. 152000 set

1 Net post "Evolution" square 80 x 80 mm

Made of heavy duty aluminum, 80 x 80 mm with rounded corners for minimum risk of injuries. Dull silver protective finish, including nicely shaped plastic caps. ScoreMax big size scoreboard

This scoreboard 12 cm or 5 inch big numbers and can be seen from far.

Best visual results because of white numbers on a dark green back.

The construction of the frame is using heavy duty aluminum, giving the scoreboard its strength.

Corners are connectrd by special fixation elements made of stainless steel.

The ScoreMax is very easy to operate and has special designes turning handles.

The number plates are very flexible and light and because of the space within the scoreboard they do not glu to each other.

ScoreMax can be delivered with customized printing on top.

Size appr. 100 x 75 cm / 40 x 30 inch

No. 250500 piece

Frame addition for changable name plates.
